Dear Josh:

Both for my benefit and that of students taking the bacterial genetics course next summer, I would like to obtain a more complete set of your reprints. We do not need:

Heredity 1948 2: 145-198
Cold Spring Harbor Symp. 1946 XI 113-114
Am. Rev. Microb. 1949 1-22
Proc. Nat. Acad. Sc. 1949 35: 178-184
Genetics 1947 32: 505-525

We have also been interested in bacterial resistance to enzyme inhibitors and would like to produce crosses of resistant and non-resistant stocks, using strains having suitable genetic markers, somewhat as described by Cavalli and Maccacaro in the current MGB. Could you send me two K-12 strains well tagged and not too ornery?

Yours sincerely,

Vernon Bryson
